Preparation of the Activity Plan and Attachment 3

In principle, places visited during the first 14 days should be chosen from the “List of Permitted Destinations.”

If it is requested to visit locations which are not in the “List of Permitted Destinations,” the CLO must complete Attachment 3 sheet as well. Attachment 3 will be submitted to the government of Japan for review and approval. Reviewing these cases will take time, and there is the possibility the requested location will not be approved.

Preparation of the Activity Plan and Attachments

Basic

- **If you plan to enter Japan with a Pre-Valid Card (PVC) of the Games Accreditation OIAC / PIAC, the CLO needs to complete the Activity Plan main sheet and Attachment 1 sheet, then submit those documents to the Tokyo 2020 Functional Area for the Stakeholder group via Tokyo 2020 ICON or e-mail**

Exceptional

- **In principle, all Games participants entering Japan after the 1st of July 2021 should enter Japan with a Pre-valid Card (OIAC/PIAC); however, for those who do not have PVC and are planning to enter Japan by special visa, the CLO must complete the Activity Plan main sheet and Attachment 2 and submit these files to the Tokyo 2020 Functional Area for the Stakeholder group via Tokyo 2020 ICON or e-mail**
- **For the first 14 days in Japan, participants should choose to visit only the locations in “List of Permitted Destinations”; however, if it is requested to visit locations which are not in the “List of Permitted Destinations,” the CLO needs to complete the Activity Plan main sheet and Attachment 3 sheet.**

Preparation of the Activity Plan and Attachments

Precautions

- Limit visits to locations which are essential for your role and include all possible destinations in the column of places to visit in the Activity Plan
- In the Activity Plan, if "**3. Operate from the next day of arrival**" is requested, the reason **why** the participant can not accept 3 days of quarantine must be **clearly described**. For example:
 - example 1: The participant is attending a competition just before arriving in Japan and therefore cannot arrive earlier in Japan to perform quarantine. Since the participant is essential for the Games, it is necessary for the participant to start their activities immediately after entering Japan
 - example 2: It is essential to enable an athlete/official to start their activities right after entering Japan in order to maintain/support maintaining conditions of the athlete.
